## DETAILED ACTION

Claims 1-6 are pending.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gammie et al. (US 5,237,610; hereinafter Gammie) in view of Bilbrey (US 2002/0164156).

Regarding claims 1, 2, 4, and 6:

Gammie discloses a method and system for a Removable Digital Content Security Devices for delivering a stream of decrypted program content, comprising security device means, connected to a first consumer electronics device, for receiving a stream of encrypted program content from a source (figure 5, decoder 506 receives encrypted program content through satellite link 505; output 509 will be inherently connected to a tv, vcr, etc.) and decryption means for converting said received encrypted program content to decrypted program content (column 6 lines 26-30, program descrambler 508 reads the decrypted key and uses the key to descramble and output descrambled program). Gammie does not disclose a wireless transmitter means for wirelessly transmitting said decrypted program content to at least one other consumer electronics device. Bilbrey discloses a portable video playback device

adapted to receive compressed video data via an antenna and RF receiver (paragraph 34). It is inherent that a RF transmitter is paired with an RF receiver. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the system of Gammie to add the portable playback device of Bilbrey in order to reproduce compressed video information by a portable device (paragraph 4).

Regarding claims 2 and 5:

It is inherent that a RF transmitter and receiver use the same link layer and physical layer protocols (protocol as defined by Encarta dictionary is a set of technical rules for the transmission and receipt of information between computers; thus there must be a protocol between the two devices or else the devices will not be able to communicate properly).
